Professional Summary

Computer Science graduate and tech startups founder with practical experience in software development, IT support, systems troubleshooting, and digital product development. Built and shipped real products spanning social platforms, NGO and healthcare web systems, organizational information management, and eLearning infrastructure. Driven by product thinking, technical leadership, and building practical, user-centred solutions.

Technical Skills

Languages & Frameworks: Dart (Flutter), PHP (Laravel, CodeIgniter, Filament), JavaScript (React, NextJS, Node.js), Python, HTML/CSS, Java, C, Rust

Backend, Data & Integrations: PostgreSQL, MongoDB, MySQL, Firebase, Supabase, REST APIs, SQL

Tools & Platforms: Git, GitHub, VS Code, Android Studio, Figma, Postman, Docker, Vercel, Netlify, Render, Railway, Cloudflare, XAMPP, Laravel Herd, phpMyAdmin, Anaconda, Photoshop

IT & Engineering: Hardware Diagnostics & Repair, OS Deployment & Configuration, BIOS Configuration, Driver Installation, Software Troubleshooting, Endpoint Protection, IT Service Delivery, Technical Support

Professional & Entrepreneurial Experience

Kamp **June 2026 – Present**
Founder & CTO | Full-Stack Mobile Developer *Nigeria*

- Founded and lead Kamp, a live anonymous campus social networking platform that enables verified university students to connect, share, and engage within their campus community — from idea through architecture, development, and launch.
- Own the full technical stack: Flutter mobile development, backend engineering, system architecture, UI/UX design, deployment, and ongoing product iteration.
- Built core features including anonymous posts, reactions, campus feeds, direct messaging, push notifications, institutional email verification, content reporting, and moderation workflows.
- Launched the Android application at McPherson University, onboarding 50+ verified early users and actively iterating toward multi-university expansion.

Diverse Labs **April 2025 – Present**
Co-Founder & Chief Technology Officer *Nigeria*

- Co-founded a technology venture delivering software products, websites, UI/UX design, and technical consulting for businesses and early-stage startups.
- Serve as the primary software developer and technical lead — translating client requirements into production-ready digital products across architecture, development, testing, and delivery.
- Delivered multiple live client products including Sauki, HerKudi, etc.; collaborated with a cross-functional team spanning engineering, design, product, and business strategy.

The Source Computers Limited **March 2025 – November 2025**
Computer Engineering Intern | Service Delivery *Lekki, Lagos*

- Supported day-to-day service delivery operations: hardware diagnostics, software installation, system configuration, and client-facing technical support across laptop and desktop environments.
- Performed Windows deployment and activation, BIOS configuration, driver and application installation, and endpoint protection setup for client systems.
- Contributed to incident triage, system maintenance documentation, upgrade deployments, logistics coordination, and service delivery reporting.

Boundless Horizons Foundation **March 2022 – June 2025**
Website Developer & Manager | Volunteer *Remote*

- Designed, built, and continue to manage the foundation's official website (bhzsfoundation.org), supporting its digital presence and community fundraising goals.
- Integrated donation and registration forms, event updates, and SEO improvements; provide ongoing maintenance and technical support.

Vigilant Heart Charitable Society (VHCS) **July 2024 – Present**
Website Manager, Developer & Technical Support | Volunteer *Lekki, Lagos*

- Managed and developed the organization's website, provided technical support, and developed the Orphanage Management System (OMS) to support the digitalization of organizational and welfare operations.
- Supported organizational operations through record management, documentation, technology assistance, and coordination with staff, visitors, donors, and other stakeholders.

Featured Projects

Orphanage Management System (OMS) | *Laravel (Filament), PHP, PostgreSQL, JavaScript* July 2026

- Designed and developed a full-featured web platform for Vigilant Heart Charitable Society to centralize child welfare records, educational tracking, donor management, project logs, and inventory — replacing fragmented manual systems.
- Completed as a final-year Computer Science thesis project; produced comprehensive documentation covering requirements, system design, implementation, testing, and evaluation.

Clinical Management System | *Collaborative Development — McPherson University* July 2026

- Co-developed a digital clinical management platform for McPherson University, handling clinical records, patient workflows, and operational information for the university health centre.
- Led backend architecture and data modelling; collaborated on system design, integration, and testing through to deployment.

Job Application Portal | *PHP, CodeIgniter, CodeIgniter Shield, MySQL* December 2024

- Built a complete web-based job application platform with secure authentication, role-based access control, job listing management, and application-status workflows.

Employee Payroll & Management System | *Python, CustomTkinter, PyInstaller* November 2024

- Developed a desktop payroll and HR management tool with salary calculation, employee data management, and CSV-based record keeping; packaged as a standalone executable for easy deployment.

Leadership & Community

National Association of Computing Students (NACOS) 2025 – 2026 *Computer Science Department Coordinator* McPherson University

- Led departmental student initiatives including the Buildathon Innovation Challenge, a Laptop Clinic for student hardware support, technical mentorship, and professional development programmes.
- Served as the primary liaison between the student body and departmental leadership, fostering a culture of practical learning and collaboration.

Education

McPherson University Graduated July 2026 *Bachelor of Science (B.Sc.) in Computer Science* Ogun State, Nigeria

Final-Year Project: Design and Implementation of an Orphanage Management System: A Case Study of Vigilant Heart Charitable Society

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Algorithm Analysis, Database Management, Artificial Intelligence & Deep Learning, Operating Systems, Computer Architecture, Discrete Mathematics

Professional Membership

Graduate Member, GMCPN July 2026 Computer Professionals (Registration Council of Nigeria)
